Safety Data Sheet per OSHA HazCom 2012

Product name: 2-Chloro-(4-trifluoromethyl)benzonitrile (Contd. of page 1) After skin contact Immediately wash with water and soap and rinse thoroughly. Seek immediate medical advice. After eye contact Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing Seek medical treatment Information for doctor Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed No further relevant information available. 5 Fire-fighting measures Extinguishing measures Extinguishing media Suitable extinguishing agents Carbon dioxide, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. Special hazards arising from the substance or mixture If this product is involved in a fire, the following can be released: Carbon monoxide and carbon dioxide Nitrogen oxides (NOx) Hydrogen cyanide (HCN) Hydrogen chloride (HCI) Hydrogen fluoride (HF) Advice for firefighters Protective eauipment: **Protective equipment:** Wear self-contained respirator. Wear fully protective impervious suit. 6 Accidental release measures **Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Environmental precautions: Do not allow material to be released to the environment without proper governmental permits. Methods and material for containment and cleaning up: Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose of contaminated material as waste according to section 13. Dispose of contaminated material as waste according to section 13. Ensure adequate ventilation. **Prevention of secondary hazards:** No special measures required. **Reference to other sections** See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for disposal information. 7 Handling and storage Handling Precautions for safe handling Keep container tightly sealed. Store in cool, dry place in tightly closed containers. Ensure good ventilation at the workplace. Information about protection against explosions and fires: No information known. Conditions for safe storage, including any incompatibilities Storage Requirements to be met by storerooms and receptacles: No special requirements. Information about storage in one common storage facility: Store away from oxidizing agents. Further information about storage conditions: Keep container tightly sealed. Store in cool, dry conditions in well sealed containers. Specific end use(s) No further relevant information available. 8 Exposure controls/personal protection Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data Exposure controls Personal protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Remove all soiled and contaminated clothing immediately. Wash hands before breaks and at the end of work. Audid contact with the eves and skin Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of hands: Impervious gloves Check protective gloves prior to each use for their proper condition. The selection of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. **Penetration time of glove material (in minutes)** Not determined **Eye protection:** Safety glasses **Body protection:** Protective work clothing. 9 Physical and chemical properties Information on basic physical and chemical properties General Information Appearance: Form: Liauid Color: Pale yellow Odor. Characteristic Odor threshold: Not determined (Contd. on page 3)

Product name: 2-Chloro-(4-trifluoromethyl)benzonitrile

pH-value: Not determined. Change in condition Not determined Melting point/Boiling range: 192-193 °C (378-379 °F) Sublimation temperature / start: Not determined Flash point: 104 °C (219 °F) Flash point: 104 °C (219 °F) Ignition temperature: Not determined Jgnition temperature: Not determined Decomposition temperature: Not determined Auto igniting: Not determined Lower: Product does not present an explosion hazard. Explosion limits: Not determined Lower: Not determined Vapor pressure: Not determined Not determined Not determined Upper: Not determined Not determined Not determined Upper: Not determined Not determined Not determined Upper: Not determined Not determined Not determined Not determined Not determined Upper: Not determined Not determined Not determined Density at 20 °C (68 °F): 1.389 g/cm³ (11.591 lbs/g	
Change in condition Melting point/Melting range: Not determined Boiling point/Boiling range: 192-193 °C (378-379 °F) Sublimation temperature / start: Not determined Flash point: 104 °C (219 °F) Flammability (solid, gaseous) Not determined. Ignition temperature: Not determined. Ignition temperature: Not determined Decomposition temperature: Not determined Auto igniting: Not determined. Danger of explosion: Product does not present an explosion hazard. Explosion limits: Not determined Lower: Not determined Vapor: Not determined Vapor: Not determined Vapor pressure: Not determined	(Contd. of page 2)
Melfing point/Melting range: Not determined Boiling point/Boiling range: 192-193 °C (378-379 °F) Sublimation temperature / start: Not determined Flash point: 104 °C (219 °F) Flammability (solid, gaseous) Not determined. Ignition temperature: Not determined. Ignition temperature: Not determined Decomposition temperature: Not determined. Auto igniting: Not determined. Danger of explosion: Product does not present an explosion hazard. Explosion limits: Lower: Lower: Not determined Vapor: Not determined Vapor: Not determined Vapor: Not determined	
Flammability (solid, gaseous) Not determined. Ignition temperature: Not determined Decomposition temperature: Not determined Auto igniting: Not determined. Danger of explosion: Product does not present an explosion hazard. Explosion limits: Image: Lower: Not determined Upper: Not determined Vapor pressure: Not determined	
Explosion limits: Lower: Not determined Upper: Not determined Vapor pressure: Not determined	
Relative density Not determined. Vapor density Not determined. Evaporation rate Not determined. Solubility in / Miscibility with Not miscible or difficult to mix Water: Not miscible or difficult to mix Partition coefficient (n-octanol/water): Not determined. Viscosity: dynamic: Not determined. kinematic: Not determined. Other information No further relevant information available.	

10 Stability and reactivity

Reactivity No information known. Chemical stability Stable under recommended storage conditions. Thermal decomposition / conditions to be avoided: Decomposition will not occur if used and stored according to specifications. Possibility of hazardous reactions No dangerous reactions known Conditions to avoid No further relevant information available. Incompatible materials: Oxidizing agents Hazardous decomposition products: Carbon monoxide and carbon dioxide Nitrogen oxides Hydrogen clanide Hydrogen fluoride

11 Toxicological information

Information on toxicological effects
Acute toxicity:
Harmful if inhaled.
Harmful if swallowed.
Harmful if swal

13 Disposal considerations

Waste treatment methods Recommendation Consult state, local or national regulations to ensure proper disposal. Uncleaned packagings: Recommendation: Disposal must be made according to official regulations.
