

Safety Data Sheet per OSHA HazCom 2012

(Contd. on page 2)

LISA

(Contd. of page 1) 4 First-aid measures Description of first aid measures After inhalation Supply fresh air. If required, provide artificial respiration. Keep patient warm. Seek immediate medical advice. After skin contact After skin contact Immediately wash with water and soap and rinse thoroughly. Seek immediate medical advice. After eye contact Rinse opened eye for several minutes under running water. Then consult a doctor. After swallowing Seek medical treatment. Information for doctor Most important symptoms and effects, both acute and delayed No further relevant information available. Indication of any immediate medical attention and special treatment needed No further relevant information available. 5 Fire-fighting measures Extinguishing media Suitable extinguishing agents CO2, sand, extinguishing powder. Do not use water. Special hazards arising from the substance or mixture If this product is involved in a fire, the following can be released: Carbon monoxide and carbon dioxide Sulfur oxides (SOX) Advice for firefighters Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit. Extinguishing media 6 Accidental release measures Personal precautions, protective equipment and emergency procedures Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Keep away from ignition sources Environmental precautions: Do not allow material to be released to the environment without proper governmental permits. Methods and material for containment and cleaning up: Keep away from ignition sources. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose of contaminated material as waste according to section 13. Ensure adequate ventilation. Prevention of secondary hazards: Keep away from ignition sources Prevention of secondary hazards: Keep away from ignition sources. Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for disposal information. 7 Handling and storage Handling Precautions for safe handling Keep container tightly sealed. Store in cool, dry place in tightly closed containers. Ensure good ventilation at the workplace. Information about protection against explosions and fires: Protect against electrostatic charges. Fumes can combine with air to form an explosive mixture. Keep ignition sources away. Conditions for safe storage, including any incompatibilities Storage Requirements to be met by storerooms and receptacles: No special requirements. Information about storage in one common storage facility: Store away from oxidizing agents. Further information about storage conditions: Keep container tightly sealed. Store in cool, dry conditions in well sealed containers. Specific end use(s) No further relevant information available. 8 Exposure controls/personal protection Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data Exposure controls Personal protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Remove all soiled and contaminated clothing immediately. Wash hands before breaks and at the end of work. Do not inhale gases / fumes / aerosols. Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of hands: Impervious gloves Check protective gloves prior to each use for their proper condition. The selection of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration time of glove material (in minutes) Not determined Eye protection: Safety glasses Body protection: Protective work clothing. Exposure controls

9 Physical and chemical propertie	25			
Information on basic physical and cl General Information Appearance:				
Form: Color:	Liquid Colorless			
Odor: Odor threshold:	Garlic-like Not determined.			
pH-value:	Not determined.			
Change in condition				
Melting point/Melting range: Boiling point/Boiling range: Sublimation temperature / start:	Not determined 180-190 °C (356-374 °F) Not determined			
Flash point: Flammability (solid, gaseous) Ignition temperature: Decomposition temperature: Auto igniting:	51 °C (124 °F) Not determined. Not determined Not determined.			
Danger of explosion:	Product is not explosive. However, formation of explosive air/vapor mixtures is possible.			
Explosion limits: Lower:	Not determined			
Upper: Vapor pressure:	Not determined Not determined			
Vapor pressure: Density at 20 °C (68 °F):	1.008 g/cm³ (8.412 lbs/gal) Not determined.			
Relative density Vapor density	Not determined.			
Evaporation rate Solubility in / Miscibility with	Not determined.			
Water: Partition coefficient (n-octanol/water Viscosity:	Not miscible or difficult to mix r): Not determined.			
dynamic: kinematic:	Not determined. Not determined.			
Other information	No further relevant information available.			
Chemical stability Stable under recommended storage conditions. Thermal decomposition / conditions to be avoided: Decomposition will not occur if used and stored according to specifications. Possibility of hazardous reactions No dangerous reactions known Conditions to avoid No further relevant information available. Incompatible materials: Oxidizing agents Hazardous decomposition products: Carbon monoxide and carbon dioxide Sulfur oxides (SOx) Hydrogen sulfide				
11 Toxicological information				
Reproductive toxicity: No effects kno Specific target organ system toxicity Aspiration hazard: No effects known. Subacute to chronic toxicity: The Registry of Toxic Effects of Chemin Behavioral - ataxia. Lungs, Thorax, or Respiration - other c Blood - other hemolysis with or without Blood - other hemolysis with or without Blochemical - Enzyme inhibition, induci Biochemical - Charges - tumors. Kidney, Ureter, Bladder - other changes. Endocrine - other changes. Endocrine - other changes. Endocrine - other changes inspleen weight. Nutritional and Gross Metabolic - weigh Nutritional and Gross Metabolic - other	 classification: No data skin irritation. prown. nown. a on carcinogenic properties of this material is available from the EPA, IARC, NTP, OSHA or ACGIH. wn. y - repeated exposure: No effects known. y - repeated exposure: May cause respiratory irritation. ical Substances (RTECS) reports the following effects in laboratory animals: changes. t anemia. ood cells. tion, or change in blood or tissue levels - multiple enzyme effects. tion, or change in blood or tissue levels - hepatic microsomal mixed oxidase. tion, or change in blood or tissue levels - other transferases. tion, or change in blood or tissue levels - other enzymes. 			
12 Ecological information				
Toxicity Aquatic toxicity: No further relevant in Persistence and degradability No fur	nformation available. rther relevant information available.			

Persistence and degradability No further relevant information available. Bioaccumulative potential No further relevant information available. Mobility in soil No further relevant information available.
