**Subacute to chronic toxicity:** No effects known.  
**Subacute to chronic toxicity:**  
Organic phosphorus compounds exhibit a wide range of toxicity. Most are skin and eye irritants with the more volatile also being respiratory irritants. Those exhibiting substantial water reactivity will have stronger irritating properties and may be corrosive enough to cause severe burns. Some organic phosphorus compounds are cholinesterase inhibitors. Symptoms associated with these include muscle twitching, convulsions, flaccid paralysis, coma, respiratory failure. They can be highly paralytic.  
**Additional toxicological information:** To the best of our knowledge the acute and chronic toxicity of this substance is not fully known.
