

Safety Data Sheet per OSHA HazCom 2012

Product name: Hydrogen fluoride-pyridine

(Contd. of page 1)

Identification number(s): EC number: 250-889-6

4 First-aid measures

Description of first aid measures

General information Immediately remove any clothing soiled by the product. Remove breathing apparatus only after contaminated clothing has been completely removed. In case of irregular breathing or respiratory arrest provide artificial respiration.

After inhalation Supply fresh air. If required, provide artificial respiration. Keep patient warm. Seek immediate medical advice.

Seek immediate medical advice. **After skin contact** Immediately wash with water and soap and rinse thoroughly. Seek immediate medical advice. Rub in calcium gluconate solution or calcium gluconate gel immediately. **After eye contact** Rinse opened eye for several minutes under running water. Then consult a doctor. **After swallowing** Do not induce vomiting; immediately call for medical help. **Information for doctor Most important symptoms and effects**, both acute and delayed

Most important symptoms and effects, both acute and delayed Causes severe skin burns. Causes serious eye damage.

Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Fire-fighting measures

Extinguishing media Suitable extinguishing agents CO2, sand, extinguishing powder. Do not use water. Special hazards arising from the substance or mixture If this product is involved in a fire, the following can be released: Carbon monoxide and carbon dioxide Hydrogen fluoride (HF) Nitrogen oxides (NOx) Advice for fuer fortune Nitrogen oxides (NOX) Advice for firefighters Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit.

6 Accidental release measures

Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation Environmental precautions: Do not allow material to be released to the environment without proper governmental permits. Methods and material for containment and cleaning up: Methods and material for containment and cleaning up. Keep away from ignition sources. Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Use neutralizing agent. Dispose of contaminated material as waste according to section 13. Ensure adequate ventilation. Prevention of secondary hazards: No special measures required. Reference to other sections See Section 7 for information on safe handling See Section 7 for information on personal protection equipment. See Section 13 for disposal information. See Section 13 for disposal information. 7 Handling and storage

Handling Precautions for safe handling Handle under dry protective gas. Keep container tightly sealed. Store in cool, dry place in tightly closed containers. Ensure good ventilation at the workplace. Open and handle container with care. Information about protection against explosions and fires: No information known.

Conditions for safe storage, including any incompatibilities Storage

Requirements to be met by storerooms and receptacles: Unsuitable material for container: ceramic, glass Information about storage in one common storage facility: Store away from oxidizing agents. Store away from water/moisture. Further information about storage conditions: Store under dry inert gas. This product is moisture sensitive. Keep container tightly sealed. Store in cool, dry conditions in well sealed containers. Protect from humidity and water. Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Components with limit values that require monitoring at the workplace:

Pvridine

ppm ACGIH TLV 1: animal carcinogen AUGIN TLV Austria MAK Belgium TWA Denmark TWA Finland TWA France VME 5 5 5 5; 10-STEL (skin) 5; 10-VLE

Ingredients with biological limit values:		
32001-55-1 Hydrogen fluoride-pyridine (100.0%) BEI (USA) 2 mg/L		
Medium: urine Time: prior to shift Parameter: Fluoride (background, nonspecific)		
3 mg/L Medium: urine Time: end of shift Parameter: Fluoride (background, nonspecific)		
Additional information: No data		
Exposure controls Personal protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed. Remove all soiled and contaminated clothing immediately. Wash hands before breaks and at the end of work. Store protective clothing separately. Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use self-contained respiratory protective device in emergency situations. Protection of hands: Impervious gloves		
Avoid contact with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use self-contained respiratory protective device in emergency situations. Protection of hands:		
Check protective gloves prior to each use for their proper condition. The selection of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Eve protection:		
Tightly sealed goggles Full face protection Body protection: Protective work clothing.		
9 Physical and chemical properties Information on basic physical and chemical properties		
General Information Appearance: Form: Liquid		
Color: Amber Odor: Not determined		
Odor threshold: Not determined. pH-value: Not determined.		
Change in condition Not determined Melting point/Melting range: Not determined Boiling point/Boiling range: Not determined Sublimation temperature / start: Not determined		
Flash point: Not determined Flammability (solid, gaseous) Not determined. Ignition temperature: Not determined. Decomposition temperature: 50 °C (122 °F) (approx)		
Auto igniting: Not determinéd.	an explosion hazard	
Danger of explosion: Product does not present Explosion limits: Not determined Lower: Not determined Upper: Not determined	απ σχρισοιστη παζατα.	
Upper: Not determined Vapor pressure: Not determined

Density: Not determined Relative density Not determined. Vapor density Not determined. Evaporation rate Not determined. Solubility in / Miscibility with Water: Warer: Hydrolyzes Partition coefficient (n-octanol/water): Not determined. Viscosity: Not determined. Other information Not determined. Viscosity: Not determined. Other information Not determined. Viscosity: Not determined. Other information known. Chemical stability and reactivity Reactivity No information known. Chemical stability Stable under recommended storage conditions. Thermal decomposition / conditions to be avoided: Decomposition will not occur if used and stored according to specifications. Possibility of hazardous reactions No dangerous reactions known Conditions to avoid No further relevant information available. Incompatible materials: Oxidizing		
Reactivity No information known. Chemical stability Stable under recommended storage conditions. Thermal decomposition / conditions to be avoided: Decomposition will not occur if used and stored according to specifications. Possibility of hazardous reactions No dangerous reactions known Conditions to avoid No further relevant information available. Incompatible materials: Oxidizing agents Water/moisture Hazardous decomposition products: Carbon monoxide and carbon dioxide		
Nitrogen oxides		
11 Toxicological information Information on toxicological effects Acute toxicity: Fatal if inhaled Fatal in nontact with skin. Fatal if nontact with skin. Fatal if swallowed. Danger through skin absorption. Swallowing will lead to a strong corrosive effect on mouth and throat and to the danger of perforation of esophagus and stomach. LDLCOS values that are relevant for classification: INH-HMN LCL:: 50 ppm/16/ (HF) IHL-RAT LCS0: 1276 ppm/11 (HF) IHL-RAT LCS0: 1276 ppm/14 (HF) INH-MKV LCS0: 01774 ppm/14 (HF) INH-GPG LCS0: 4327 ppm/15M (HF) Skin irritation or corrosion: Causes severe skin burns. Eye Irritation or corrosion: Causes severe skin burns. Eye Irritation or corrosion: Causes severe skin burns. Germ cell mutagenicity: No effects known. Germ cell mutagenicity: No effects known. Specific target organ system toxicity - repeated exposure: No effects known. Specific target organ system toxicity - single exposure: No effects known. Subacute to chronic toxicity: Hydrofluoric acid is extremely irritating and corrosive. It is destructive of tissues it comes in contact with hydrofluoric acid has led to industrial faltilities. Dilute solutions have a reduced effect. Subacute to chronic toxicity: No effects known. Subacute to chronic toxicity: Providine is sistonally inclusing and on the stable only to get much worse several hours after exposure. Skin contact with hydrofluoric acid has led to industrial faltilities. Dilute solutions have a reduced effect. Subacute to chronic toxicity: Providine is strong transition. Subacute to chronic toxicity: Providine is strong to toxicity: No effects known. Subacute to chronic toxicity: Providine is strong to the bestable only to get much worse several hours after exposure. Skin contact with hydrofluoric acid has led to industrial faltilities. Dilute solutions have a reduced effect. Subacute to chronic toxicity: Providine is strong to the bestable only to get much worse severas, in		
12 Ecological information Toxicity Aquatic toxicity: No further relevant information available. Persistence and degradability No further relevant information available. Bioaccumulative potential No further relevant information available. Mobility in soil No further relevant information available. Mobility in soil No further relevant information available. Additional ecological information: General notes: Do not allow product to reach ground water, water course or sewage system. Do not allow material to be released to the environment without proper governmental permits. Danger to drinking water if even small quantities leak into the ground. Avoid transfer into the environment. Results of PBT and vPvB assessment PBT: Not applicable. VPVB: Not applicable. Other adverse effects No further relevant information available.		
13 Disposal considerations Waste treatment methods Recommendation Consult state, local or national regulations to ensure proper disposal. Uncleaned packagings: Recommendation: Disposal must be made according to official regulations.		
14 Transport information		
UN-Number DOT, IMDG, IATA UN2922		
UN proper shipping name DOT Corrosive liquids, toxic, n.o.s. (Hydrofluoric acid)
