

Safety Data Sheet per OSHA HazCom 2012

-	Product name: 2-Bromo-3-methylbenzoic acid		
Media Market symphons and effects, both acute and delayed No humber relevant information available.  S Fire-fighting measures			(Contd. of page 1)
S Fire-fighting measures Extra patients under Extra patients Extr	Most important symptoms and effects	s, both acute and delayed No further relevant information available.	
Evinguishing model Similable exigning append to charge dioxide, exingliability powher or water spray. Fight larger fires with water spray or alcohol resistant toam. Similable exingliability append to the processing of the released of the product is involved in a fire, the following can be released of the product is involved in the processing of the released of the eving of the processing of the processing of the product is involved in the processing of the released of the eving of the processing of the processing of the product is involved in the processing of the processing of the eving of the processing of the processing of the processing of the processing of the processing of the eving of the eving of the processing of		attention and special treatment needed too further relevant information available.	
Cacho menodo e and canton dixide	Extinguishing media Suitable extinguishing agents Carbon Special hazards arising from the subs	stance or mixture	
Wear Hulp protective sequences <ul></ul>	Carbon monoxide and carbon dióxide Hydrogen bromide (HBr) Advice for firefighters Protective equipment:		
Personal precautions, protective equipment and emergency procedures         Where productive equipment. Keep unproducted presents addrugted without proper governmental permits.         Environmental precautions, Do not allow material to be reliased to the environment without proper governmental permits.         Preference of the rediction of the precedure of the environment without proper governmental permits.         Preference of the rediction of the precedure of the environment without proper governmental permits.         Preference of the rediction of the precedure of the environment without proper governmental permits.         Preference of the rediction of the precedure of the environment without proper governmental permits.         Preference of the rediction of the precedure of the environment without proper governmental permits.         Preference of the precedure of the environment of the environment.         Section 11.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1.1	Wear self-contained respirator. Wear fully protective impervious suit.		
Methods and internal for containment and cleaning up: Ensure adoquate ventilation. Reference to cherr sections: See Section 10 for internation on safe handling See Section 11 for internation on safe handling Reference to cherr sections: See Section 11 for internation on safe handling Reference to cherr sections: See Section 11 for internation on safe handling Reference to cherr sections: See Section 11 for internation on safe handling Reference to cherr sections: See Section 11 for internation on safe handling Reference to cherr sections: See Section 11 for internation on the sections: See Section 11 for internation on the section of the section of the section of the sections: See Section 11 for internation advector sections: Section 11 for internation intervector advector for intervector advector sections: Section 11 for intervector sections: Section 11 for intervector advector section 11 for intervector sections: Sections: 11 for intervector section	Personal precautions, protective equi Wear protective equipment. Keep unprot Ensure adequate ventilation	tected persons away.	
See Section 13 for disposal information. 7 Handling American Storage Handling Frequencing	Methods and material for containment Prevention of secondary hazards: No Reference to other sections See Section 7 for information on safe ha	nt and cleaning up: Ensure adequate ventilation. special measures required. andling	
Handling Keep container lightly sealed.         Keep container lightly sealed.         Ensure good withlation at the workplace.         Ensure good withlation at the workplace.         Ensure good withlation at the workplace.         Information about protection against explosions and fires: No information known.         Conditions for safe storago, including any incompatibilities         Storage         Information about storage conditions:         Keep container lightly sealed.         Specific and use(s) No further relevant information available.         8 Exposure controls/personal protection         Additional information about storage conditions:         Keep containers.         Property operating chemical tume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute.         Control parameters         Propenditional information bout storage in a proving a the workplace: Not required.         Additional information No data         Personal protective and hygion measures         General protective and hygion measures         Protecution of hands:         Manitabian ar exponetive and hygion measures         Protecution of hands:	See Section 8 for information on personal See Section 13 for disposal information.		
Store in cool, dry place in tightly closed containers. Information about proceiner longibilist glosenss and free: No information known. Conditions for safe storage, including any incompatibilities Storage Requirements to be met by storerooms and receptacles: No special requirements. Information about storage in an encommon storage facility: Store away from oxiding agents. Reproduction of cyconditions in well sealed containers. Specific and use(s) No further relevant information available. Specific and use(s) No further relevant information charactous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data Exposure controls Personal protective equipment Resource controls Resource avail from mostares for handling chemicals should be followed. Keep away from foodstuffs, beverages and feed Renova all soled and containsted colling immediately. Avoid contact with the eyes and shoil more. The useling propriate working environment. Breating equipment: Use subable respiration when ingit concentrations are present. Renove all soled and containsted colling immediately. Monition an equipment: Use subable respiration when ingit concentrations are present. Renove all soled and contains are present. Renove all soled and contains are present. Renove all	Handling Precautions for safe handling Keep container tightly sealed.		
Storage       The second properties         Requirements to be met by storerooms and receptacles: No special requirements. Information about storage in one common storage facility: Store away from oxidizing agents. Information about storage in one common storage facility: Store away from oxidizing agents. Keep container tightly sealed:         8 Exposure controls/personal protection         Additional information about design of technical systems: Properly operating chemical tume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters         Components with limit values that require monitoring at the workplace: Not required. Additional information: No data         Exposure controls (personal protection components with limit values that require monitoring at the workplace: Not required. Additional information: No data         Remove all solide and containated columnent. Remove all solide and containated column. Remove all solide and containated column. Network all solid and containated to the immediately. Additional information working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of lands: The suel appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of lands: The selection: Safety dises. Body protection: Protective work columns.         9 Physical and chemical properties       Information on basic physical and chemical properties Color: Not determined. Deparameters: Form:         9 Physical and chemical properties Color: Color: Color: Multing personal protective spiration in the determined. Deparameterine       Not determined. Deparameter in the d	Ensure good ventilation at the workplace Information about protection against	e. <b>explosions and fires:</b> No information known.	
Information about storage in one common storage facility: Store away from oxidizing agents. Further information about storage conditions: Specific end user(s) No further relevant information available. Second of the conditions is stored and the second available. Exposure controls/personal protection Additional information about design of technical systems: Properly operating chemical fume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute. Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data Exposure controls Personal protective equipment General protective and hygienic measures Reproved protective and hygienic measures (Reproved protective agent) from the finite of the incluse should be followed. Remove all solide and containinated cichting immediately. Wash hands below breaks and at the end of work. Wash hands below breaks and at the end	Storage		
8       Exposure controls/personal protection         Additional information about design of technical systems: Properly operating chemical lume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute.         Control parameters Components with limit values that require monitoring at the workplace: Not required. Additional information: No data         Exposure controls General protective equipment General protective and hygienic measures The usual precautionary measures for handling chemicals should be followed. Keep away from footstifts, beverages and feed. Remove all solied and contaminated clothing immediately. With models with the eyes and skin. Maintain an ergonomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Protection of hands: Imparious gloves Over material (in minutes) Not determined Eye protection: Solitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration time of glove material (in minutes) Not determined Eye protection: Protective work clothing.         9 Physical and chemical properties General Information Appearance: Coric:	Information about storage in one com Further information about storage con Keep container tightly sealed. Store in cool, dry conditions in well seale	nmon storage facility: Store away from oxidizing agents. nditions: ed containers.	
Additional information about dasign of technical systems: Properly operating chemical tume hood designed for hazardous chemicals and having an average face velocity of at least 100 feet per minute.         Control parameters Components with limit values that require monitoring at the workplace: Not required.         Additional information: No data         Exposure controls Personal protective equipment General protective and myglenine for handling chemicals should be followed. Keep away from foodstifts, beverages and feed. Remove all solied and contaminated clothing immediately. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Maintain a regroomically appropriate working environment. Breathing equipment: Use suitable respirator when high concentrations are present. Impervision of suitable follows not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration of suitable gloves not on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration of suitable gloves not only depends on the material, but also on quality. Quality will vary from manufacturer to manufacturer. Penetration of suitable gloves not only depends on the material, but also on quality.
