

Revision number: 2 Revision date: 11/10/2015

1. IDENTIFICATION

Product name: Product code: 6,7-Dimethoxy-4-hydroxyquinoline D4695

For laboratory research purposes.

Not for drug or household use.

TCI AMERICA

SAFETY DATA SHEET

Product use: Restrictions on use:

Company:

TCI America 9211 N. Harborgate Street Portland, OR 97203 U.S.A. Telephone: +1-800-423-8616 / +1-503-283-1681 Fax: +1-888-520-1075 / +1-503-283-1987 e-mail: sales-US@TCIchemicals.com www.TCIchemicals.com

2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200:

Skin Corrosion/Irritation [Category 2] Eye Damage/Irritation [Category 2A]

Signal word:

Warning!

None

Hazard Statement(s):

Causes serious eye irritation Causes skin irritation

Pictogram(s) or Symbol(s):

Precautionary Statement(s): [Prevention] [Response]

> [Storage] [Disposal]

Wash hands and face thoroughly after handling. Wear protective gloves. Wear eye and face protection. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. None

Supplementary Information:

While this material is not classified as hazardous under OSHA, this SDS contains valuable information critical to safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

3. COMPOSITION/INFORMATION ON INGREDIENTS

3. COMPOSITION/INFORMATION ON INGREDIENTS Chemical Formula: Ci-Hi,NOs Synonyma: 6,7-Dimethoxy-4-quinclinol 4. FIRST-AID MEASURES Inhalation: Inhalation: Call a poison center or doctor if you feel unwell. Move victim to fresh air, Give artificial respiration if victim is not breathing, Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved at take precautions to protect themselves. Skin contact: If skin initiation occurs get madical advisa/attention. Remove and wash contaminated lothing before re- use. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Eye contact: If MMEDITL: If flush gets with running valer for at least 15 minutes, Howe with the resh air. Check for a remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not undex oviniting with our medical advice. If swallowed, seek medical advice immediately and shop with our docurs on tight of chings such as a collar, the best or most such advisa/state resovery basis on the victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects:	6,7-Dimethoxy-4-hydroxyquinoline	TCI AMERICA	Page 2 of 5
Chemical Formula: C ₁ H ₁ NO ₂ Synonyms: 6,7-Dimethoxy-4-quinolinol 4 . FIRST-AID MEASURES Inhalation: Call a poison center or doctor if you feel unwell. Move victim to fresh air. Give artificial respiration if victim is not breathing, Administer oxygen if breathing is difficult. Keep victim warm and quet, Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved a df skin initiation occurs get medical advice/latention. Remove and wesh contaminated clothing before re-use. In case of contact with substance, immedically flush skin with nunning water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Eye contact: IMMED/ITELY flush vees with running water for at least 15 minutes, keeping eyelids open. Contact with material maj irritate or burn systs. Call emergency medical service. Move victim to fresh air. Check for a remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce vornting with out medical advice. If swallowed, seek medical advice immediately and shop the ecowary position to so that worm will not reneare the model a personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Acute: No data available Ingestion: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of th injuy.	3. COMPOSITION/INFORMATION	ON INGREDIENTS	
Inhalation: Call a poison center or doctor if you feel unwell. Move victim to fresh air. Give artificial respiration if victin is not breathing. Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved a take precautions to protect themselves. Skin contact: If skin initiation occurs get medical adds: immediately lubs kin, with running water for at least 16 minutes. Been contain itsed closen contain itsed closen. Center with material (s) involved and take precautions to protect themselves. Eye contact: IMMEDIATELY fulls eyes with running water for at least 16 minutes. Respin geyelids open. Contact with material may initiate or burn eyes. Call emergency medical service. Move victim to fresh air. Check for a remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce voniting with out medical advice. If swallowed, seek medical advice immediately and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Accute: No data available Actue: No data available Delayed: No data available Distage for the schemical Personnel are aware of the naturo of the interselves.  is not breathing. Administer oxygen if breathing is difficult. Resp victim varm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved a take precautions to protect themselves. Skin contact: If shi initiation occurs get medical advice/attention. Remove and wash contaminated clothing before reuse. In case of contact with substance, immediately flush skin with running water for at least 15 minutes. Keeping eyelids open. Contact with MultiPATELY flush sevs with running water for at least 15 minutes. Keeping eyelids open. Contact with MultiPATELY flush sevs with running water for at least 15 minutes. Keeping eyelids open. Contact with material flush substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce vomiting with out medical advice. If swallowed, seek medical davice immediately and shor the container or flash. Do not use outh-to-mouth method 11 victim ingested the substance, give atfiliad respiration with the ald of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Cosen tight choing such as a collar, the bet or waitsband. If a preson ovnits place the in the recovery position so that vomit will not trenter the mouth and throat. Rine mouth. Keep victim ware and quiet. Treat symptomatically and supportively. Effects: Acute: No data available Dry chemical, CO₂, sand, earth, water spray or regular foam Consult with local fire authorities before themselves. <i>FIRE-FIGHTING MEASURES</i> Suitable extinguishing media: Dry chemical, CO₂, sand, earth, water spray or regular foam Consult with local fire authorities before themselves. <i>Specific hazards:</i> None Closed containers may explode from heat of a fire. Specific hazards	4. FIRST-AID MEASURES		
Skin contact: If skin initiation occurs get medical advice/attention. Remove and wash contaminated clothing before free use. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material (s) involved and take precautions to protect themselves. Eye contact: IMMEDIATELY flush eyes with running water for at least 10 minutes. Keeping eyelids open. Contact with substance may be exo. Call emergency medical service. Move vicitm to fresh air. Check for a remove any contact lenses. Keep vicitm warm and quict. Treat symptomatically and supportively. Effects exposure to substance may be delayed. Ensure that medical personnel are aware of the material (s) involved and take precautions to protect themselves. Ingestion: Do not induce vortiming with our medical advice. If swallowed, seek medical advice immediately and shop ortical ensure. It is built to a proceent themselves. Supports/effects: Acute: Do not use mouth-to-mouth method if vicitm ingested the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. The symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Acute: No data available Acute: No data available No data available Jolayed: No data available Specific hazards arising from the chemical Heazer and a specifical respiration. Use first aid treatment according to the material(s) involved and tak	Inhalation:	is not breathing. Administer oxygen if breathing is difficult. K symptomatically and supportively. Ensure that medical pers	Keep victim warm and quiet. Treat
Eye contact: IMMEDIATELY flush eyes with running water for a test 15 minutes, keeping eyelids open. Contact with material may irritate or burn eyes. Call energency medical service. More victim to fresh atir. Check for a remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effects exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Ingestion: Do not induce voniting with out medical advice. If swallowed, seek medical advice if swallowed, seek medical advice if swallowed, seek medical advice if swallowed are spreaded the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical evoice. Loosen tipt lociting subtract medical personnel are aware of the ontainer or label. Do not use mouth-ho-mouth method if victim ingested the substance; give artificial respiration with and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Acute: No data available Acute: No data available Delayed: No data available Immediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of the injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to prote themselves. Specific hazards arising from the chemical Dry chemical, CO2, sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting	Skin contact:	If skin irritation occurs get medical advice/attention. Remove use. In case of contact with substance, immediately flush sk Treat symptomatically and supportively. Ensure that medica	kin with running water for at least 20 minutes.
the container or label. Do not use mouth-to-mouth method if victim ingested the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Loosen tight clothing such as a collar, tie, belt or waistband. If a person vomits place the in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim way and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Symptoms/effects: Acute: No data available Delayed: No data available No data available No data available Immediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of the injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to prote themselves. 5. FIRE-FIGHTING MEASURES Suitable extinguishing media: Dry chemical, CO ₂ , sand, earth, water spray or regular foam Consult with local fire authorities before attempting large scale fire fighting operations. Specific hazards arising from the chemical Hazardous combustion products: None Closed containers may explode from heat of a fire. Special proceutions for fire-fighters: Use as straight streams. Dike fire-control water for later disposal; do not scatter the material. Containers may explode where heated. Move containers from fire ariting paratus (SCBA). Structural fire fighters' protective clothing provides limited protection	Eye contact:	IMMEDIATELY flush eyes with running water for at least 15 material may irritate or burn eyes. 	6. ACCIDENTAL RELEASE MEASU	IRES	

Personal precautions:	Avoid contact with skin, eyes, and clothing. Keep people away from and upwind of spill/leak. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation. Isolate the hazard area and deny entry to unnecessary and unprotected personnel.
Personal protective equipment:	Wear eye protection (splash goggles) and face protection (full length face shield). Lab coat. Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Wear protective gloves (nitrile).
Emergency procedures:	Prevent dust cloud. In case of a spill and/or a leak, always shut off any sources of ignition, ventilate the area, and excercise caution. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Warn personnel to move away. Prevent entry into sewers, basements or confined areas; dike if needed.

Methods and materials for containment and cleaning up: ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material.

6. ACCIDENTAL RELEASE MEASURES

Environmental precautions: Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined areas; dike if needed.

Precautions for safe handling:	Avoid inhalation of vapor or mist. Avoid contact with skin and eyes. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear
	suitable protective clothing, gloves and eye/face protection. When using do not eat, drink, or smoke. Keep away from sources of ignition.
Conditions for safe storage:	Keep only in the original container in a cool well-ventilated place. Keep away from incompatibles. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Avoid prolonged storage periods.
Storage incompatibilities:	Store away from oxidizing agents

8.	EXP	osu	RE	CON	TROL	.S/F	PERS	ONAL	PRO	<u>TEC</u>	TIC)V

Exposure limits:

No data available

Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

Personal protective equipment	
Respiratory protection:	Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent.
Hand protection:	Nitrile gloves.
Eye protection:	Safety glasses.
Skin and body protection:	Lab coat.

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state (20°C): Form: Color: Odor: Odor threshold:	Solid Crystal - Powder Slightly pale yellow - Yellow No data available No data available		
Melting point/freezing point: Boiling point/range: Decomposition temperature: Relative density: Kinematic Viscosity:	229°C (444°F) No data available No data available No data available No data available	pH: Vapor pressure: Vapor density: Dynamic Viscosity:	No data available No data available No data available No data available
Partition coefficient: n-octanol/water (log P _{ow})	No data available	Evaporation rate: (Butyl Acetate = 1)	No data available
Flash point: Flammability (solid, gas):	No data available No data available	Autoignition temperature: Flammability or explosive limits: Lower: No data avai Upper: No data avai	

Solubility(ies):

10. STABILITY AND REACTIVITY

Reactivity: Chemical Stability: Possibility of Hazardous Reactions: Conditions to avoid: Incompatible materials: Hazardous Decomposition Products: Not Available. Stable under recommended storage conditions. (See Section 7) No hazardous reactivity has been reported. Avoid excessive heat and light. Oxidizing agents No data available

11. TOXICOLOGICAL INFORMATION

16. OTHER INFORMATION

Revision date: 11/10/2015

Revision number: 2

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
