

# TCI AMERICA **SAFETY DATA SHEET**

**Revision number: 2** Revision date: 10/06/2014

## IDENTIFICATION

Product name: Dicyclohexylamine Nitrite

Product code: D1392

For laboratory research purposes. Product use: Restrictions on use: Not for drug or household use.

Company: TCI America

9211 N. Harborgate Street Portland, OR 97203 U.S.A.

Telephone:

+1-800-423-8616 / +1-503-283-1681

Fax:

## 2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200: Acute Toxicity - Oral [Category 4]

Acute Toxicity - Inhalation [Category 4]

Specific Target Organ Toxicity (Single Exposure) [Category 1]

Flammable Solids [Category 2]

Signal word: Danger!

Hazard Statement(s): Flammable solid

> Harmful if swallowed Harmful if inhaled

Causes damage to: Hematopoietic System

Pictogram(s) or Symbol(s):

Precautionary Statement(s):

[Prevention] Do not eat, drink or smoke when using this product. Wash hands and face thoroughly after handling. Avoid

breathing dusts or mists. Use only outdoors or in a well-ventilated area. Do not breathe dusts or mists. Keep away from heat, sparks, open flames or other hot surfaces. - No smoking. Ground or bond container and receiving equipment. Use explosion-proof electrical, ventilating, lighting, and equipment. Wear

protective gloves, eye protection and face protection.

If swallowed: Immediately call a poison center or doctor. Rinse mouth. If inhaled: Remove person to fresh [Response]

air and keep comfortable for breathing. Call a poison center or doctor if you feel unwell. If exposed: Call a poison center or doctor. In case of fire: Use dry chemical, CO2, sand, earth, water spray or regular foam to

extinguish.

[Storage] Store locked up. [Disposal]

Dispose of contents and container in accordance with US EPA guidelines for the classification and

determination of hazardous waste listed in 40 CFR 261.3. (See Section 13)

Hazards not otherwise classified: [HNOC] May develop pressure

## 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Substance

Components: Dicyclohexylamine Nitrite

 $\begin{array}{lll} \textbf{Percent:} & >97.0\%(T) \\ \textbf{CAS Number:} & 3129-91-7 \\ \textbf{Molecular Weight:} & 228.34 \\ \textbf{Chemical Formula:} & C_{12}H_{23}N\cdot HNO_2 \\ \end{array}$ 

#### 4. FIRST-AID MEASURES

Inhalation: Call emergency medical service. Effects of exposure (inhalation) to substance may be delayed. Inhalation

of vapors or contact with substance will result in contamination and potential harmful effects. Move victim to fresh air. Give artificial respiration if victim is not breathing. Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are

aware of the material(s) involved and take precautions to protect themselves.

Skin contact:

Call a poison center or doctor if you feel unwell. Effects of exposure (skin contact) to substance may be delayed. Remove and wash contaminated clothing before re-use. Remove and isolate contaminated

clothing and shoes. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical personnel are aware of the

material(s) involved and take precautions to protect themselves.

Eye contact: If this chemical contacts the eyes, immediately wash (irrigate) the eyes with large amounts of water,

occasionally lifting the lower and upper eyelids. If eye irritation persists get medical advice/attention. Move victim to fresh air. Check for and remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effects of exposure to substance may be delayed. Ensure that medical

personnel are aware of the material(s) involved and take precautions to protect themselves.

Ingestion: Harmful if swallowed. Effects of exposure (ingestion) to substance may be delayed. Call a physician or

Poison Control Center immediately. Do not use mouth-to-mouth method if victim ingested the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Loosen tight clothing such as a collar, tie, belt or waistband. If a person vomits place them in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim warm and quiet. Treat symptomatically and supportively. Ensure that medical personnel are aware

of the material(s) involved and take precautions to protect themselves.

Symptoms/effects:

Acute: No data available
Delayed: No data available

Immediate medical attention: WARNING: It might be hazardous to the person providing aid to give mouth-to-mouth respiration, because

the inhaled material is harmful. If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of the injury. Ensure that medical personnel are aware of the material(s)

involved and take precautions to protect themselves.

## 5. FIRE-FIGHTING MEASURES

 $\textbf{Suitable extinguishing media:} \qquad \qquad \text{Dry chemical, CO}_2 \,, \, \text{water spray, or alcohol-resistant foam. Consult with local fire authorities before} \\$ 

attempting large scale fire fighting operations.

Specific hazards arising from the chemical

Hazardous combustion products: These products include: Carbon oxides Nitrogen oxides Other specific hazards: Closed containers may explode from heat of a fire.

# Special precautions for fire-fighters:

Use water spray or fog; do not use straight streams. Dike fire-control water for later disposal; do not scatter the material. May re-ignite after fire is extinguished. Runoff to sewer may create fire or explosion hazard. Containers may explode when heated. Move containers from fire area if you can do it without risk.

## Special protective equipment for fire-fighters:

Wear positive pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations ONLY; it may not be effective in spill situations. Wear chemical protective clothing which is specifically recommended by the manufacturer. It may provide little or no thermal protection.

## 6. ACCIDENTAL RELEASE MEASURES

Personal precautions:

Avoid contact with skin, eyes, and clothing. Keep people away from and upwind of spill/leak. Use spark-

proof tools and explosion-proof equipment. Remove all sources of ignition. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation.

Isolate the hazard area and deny entry to unnecessary and unprotected personnel.

**Dicyclohexylamine Nitrite TCI AMERICA** Page 3 of 6

## 6. ACCIDENTAL RELEASE MEASURES

Personal protective equipment: Splash goggles. Lab coat. Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or

equivalent. Wear protective gloves (nitrile).

**Emergency procedures:** Prevent dust cloud. Do not clean-up or dispose except under supervision of a specialist. ELIMINATE all

ignition sources (no smoking, flares, sparks or flames in the immediate area). Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Warn personnel to move

away. Prevent entry into sewers, basements or confined areas; dike if needed.

#### Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). All equipment used when handling the product must be grounded. Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material.

#### **Environmental precautions:**

Keep away from living quarters. Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined areas; dike if needed.

## 7. HANDLING AND STORAGE

Precautions for safe handling: Avoid inhalation of vapor or mist. Do not ingest. Avoid contact with skin and eyes. Avoid mechanical shock

> and friction. Avoid formation of dust and aerosols. Keep away from heat and sources of ignition. Use explosion-proof equipment. Use only non-sparking hand tool when handling this product. Ground all equipment containing material. Take measures to prevent build up of electrostatic charge. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear suitable protective clothing, gloves and eye/face protection. When using do not eat, drink,

or smoke. Keep away from sources of ignition.

Store locked up. Keep containers tightly closed in a cool, well-ventilated place. Keep away from sources of Conditions for safe storage:

ignition. Store and use away from heat, sparks, open flame, or any other ignition source. Keep away from incompatibles. Containers which are opened must be carefully resealed and kept upright to prevent

leakage. Avoid prolonged storage periods.

Storage incompatibilities: Store away from oxidizing agents

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

No data available **Exposure limits:** 

#### Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

## Personal protective equipment

Respiratory protection: Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent.

Hand protection: Wear protective gloves.

Eve protection: Safety glasses. Skin and body protection: Lab coat.

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state (20°C): Solid

Crvstal - Powder Form: White - Almost white Color: Slight Amine-like Odor: Odor threshold: No data available

183°C (dec.) (361°F) No data available Melting point/freezing point: pH: 0.4kPa/25°C Boiling point/range: No data available Vapor pressure: **Decomposition temperature:** No data available Vapor density: No data available Relative density: No data available **Dynamic Viscosity:** No data available

**Kinematic Viscosity:** No data available

Partition coefficient: No data available

n-octanol/water (log Pow)

**Evaporation rate:** (Butyl Acetate = 1)

Autoignition temperature: Flash point: No data available Flammability (solid, gas): No data available Flammability or explosive limits:

> No data available Lower: No data available Upper:

No data available

No data available

Solubility(ies):

**TCI AMERICA** Page 4 of 6 **Dicyclohexylamine Nitrite** 

## 9. PHYSICAL AND CHEMICAL PROPERTIES

Water: Soluble

Soluble: Alcohols

Very slightly soluble: Benzene, Acetone

## 10. STABILITY AND REACTIVITY

Reactivity: Not Available.

Chemical Stability: Stable under recommended storage conditions. (See Section 7)

**Possibility of Hazardous Reactions:** No hazardous reactivity has been reported.

Conditions to avoid: Avoid excessive heat and light. Strong oxidizing agents Incompatible materials: **Hazardous Decomposition Products:** No data available

## 11. TOXICOLOGICAL INFORMATION

RTECS Number: HY4200000

**Acute Toxicity:** 

orl-rat LD50:330 mg/kg scu-mus LD50:155 mg/kg

ihl-rat LC:>90 mg/m<sup>3</sup>/4H skn-rat LDLo:2 g/kg

Skin corrosion/irritation:

No data available

Serious eye damage/irritation:

No data available

Respiratory or skin sensitization:

No data available

Germ cell mutagenicity:

mmo-sat 1 mg/plate (+S9)

Carcinogenicity:

scu-rat TDLo:2400 mg/kg/48W-I

IARC: No data available NTP: No data available OSHA: No data available

Reproductive toxicity: No data available

Routes of Exposure: Inhalation, Eye contact, Ingestion, Skin contact.

Symptoms related to exposure:

Overexposure may result in serious illness or death.

**Potential Health Effects:** 

No specific information available; skin and eye contact may result in irriatation. May be harmful if inhaled or ingested.

Target organ(s):

Causes damage to: Hematopoietic System

## 12. ECOLOGICAL INFORMATION

**Ecotoxicity** 

Fish: No data available Crustacea: No data available Algae: No data available

No data available Persistence and degradability: Bioaccumulative potential (BCF): No data available Mobillity in soil: No data available No data available Partition coefficient: n-octanol/water (log Pow)

No data available Soil adsorption (Koc):

## 12. ECOLOGICAL INFORMATION

Henry's Law: constant (PaM³/mol) No data available

## 13. DISPOSAL CONSIDERATIONS

Disposal of product:

Recycle to process if possible. It is the generator's responsibility to comply with Federal, State and Local rules and regulations. You may be able to dissolve or mix material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber system. This section is intended to provide assistance but does not replace these laws, nor does compliance in accordance with this section ensure regulatory compliance according to the law. US EPA guidelines for Identification and Listing of Hazardous Waste are listed in 40 CFR Parts 261. The product should not be allowed to enter the environment, drains,

water ways, or the soil.

**Disposal of container:** Dispose of as unused product. Do not re-use empty containers.

Other considerations: Observe all federal, state and local regulations when disposing of the substance.

## 14. TRANSPORT INFORMATION

## 16. OTHER INFORMATION

#### Revision number: 2

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
