

#### **Revision number: 2** Revision date: 10/06/2014

#### **IDENTIFICATION** 1.

Product name: Product code:

2-Nitrobenzenesulfonamide N0705

Not for drug or household use.

**TCI AMERICA** 

SAFETY DATA SHEET

Product use: Restrictions on use:

#### Company:

TCI America 9211 N. Harborgate Street Portland, OR 97203 U.S.A. Telephone: +1-800-423-8616 / +1-503-283-1681 Fax: +1-888-520-1075 / +1-503-283-1987 e-mail: sales-US@TCIchemicals.com www.TCIchemicals.com

#### 2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200:

Skin Corrosion/Irritation [Category 2] Eye Damage/Irritation [Category 2A]

Signal word:

Warning!

Hazard Statement(s):

Causes skin irritation

Pictogram(s) or Symbol(s):

**Precautionary Statement(s):** [Prevention] [Response]

> [Storage] [Disposal]

Wash hands and face thoroughly after handling. Wear protective gloves. Wear eye and face protection. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. None

# For laboratory research purposes.

# 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Components: Percent: CAS Number: Molecular Weight: **Chemical Formula:** 

Substance 2-Nitrobenzenesulfonamide >98.0%(HPLC)(T) 5455-59-4 202.18  $C_6H_6N_2O_4S$ 

None

Causes serious eye irritation

## 4. FIRST-AID MEASURES

Inhalation:   Call a poison center or doctor if you feel unwell. Move victim to fresh air. Give artificial is not breathing. Administer oxygen if breathing is difficult. Keep victim warm and quie symptomatically and supportively. Ensure that medical personnel are aware of the matriate precautions to protect themselves.     Skin contact:   If skin iritiation occurs get medical advice/attention. Remove and wash contaminated use. In case of contact with substance, immediately flush skin with running water for a Treat symptomatically and supportively. Ensure that medical personnel are aware of the involved and take precautions to protect themselves.     Eye contact:   IMMEDIATELY flush eyes with running water for a Treat symptomatically and supportively. Ensure that medical personnel are aware of the involved and take precautions to protect themselves.     Eye contact:   IMMEDIATELY flush eyes with running water for a least 15 minutes, keeping eyelids involved and take precautions to protect themselves.     Ingestion:   Do not induce vomiling with out medical advice. I swallowed, seek medical advice im the container or label. Do not use mouth-to-mouth method if victim ingested the substance may supportively. Ensure that medical personnel are aware of the involved and take precautions to protect themselves.     Symptoms/effects:   Acute:   Redness.     Acute:   Redness.   No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.  <	t. Treat terial(s) involved and clothing before re- t least 20 minutes. he material(s) open. Contact with sh air. Check for and upportively. Effects of he material(s) mediately and show ance; give artificial er respiratory in vomits place them th. Keep victim warm
Skin contact:   If skin irritation occurs get medical advice/attention. Remove and wash contaminated.     use. In case of contact with substance, immediately flush skin with running water for a use, in case of contact with substance, immediately flush skin with running water for at least 15 minutes, keeping eyelds in two deveload and take precautions to protect themselves.     Eye contact:   IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelds in two deveload and take precautions to protect themselves.     Ingestion:   Do not induce vomiting with out medical advice. If swallowed, seek medical advice in the exposure to substance may be delayed. Ensure that medical personnel are aware of the involved and take precautions to protect themselves.     Ingestion:   Do not induce vomiting with out medical advice. If swallowed, seek medical advice in the recovery position so that vomit will not reenter the mouth and throat. Rinse mou and quiet. Treat symptomatically and supportively. Ensure that medical personnel are material(s) involved and take precautions to protect themselves.     Symptoms/effects:   Redness.     Acute:   Delayed:     Delayed:   No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take p themselves.     Symptoms/effects:   Sectific hazards arising from the chemical     Material person advice in themedical personnel are aware of the material(s) involved and take p	clothing before re- t least 20 minutes. he material(s) open. Contact with sh air. Check for and upportively. Effects of he material(s) mediately and show ance; give artificial er respiratory on vomits place them th. Keep victim warm
Eye contact:   IMMEDIATELY flush eyes with running water for at least 15 minutes, keeping eyelids. material may irritate or burn eyes. Call emergency medical service. Move victim to free remove any contact lenses. Keep victim warn and quiet. Treat symptomatically and si exposure to substance way be delayed. Ensure that medical personnel are aware of t involved and take precautions to protect themselves.     Ingestion:   Do not induce vomiting with out medical advice. If swallowed, seek medical advice im the container or label. Do not use mount-to-mouth method if victim ingested the subst respiration with the aid of a pocket mask equipped with a one-way valve or other prop medical device. Loosen tight clothing such as a collar, tie, belt or waistband. If a perso in the recovery position so that vomit will not reenter the mouth and throat. Rinse mou and quiet. Treat symptomatically and supportively. Ensure that medical personnel are material(s) involved and take precautions to protect themselves.     Symptoms/effects: Acute: Delayed:   Redness. No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take p themselves.     5. FIRE-FIGHTING MEASURES   Dry chemical, CO2, sand, earth, water spray or regular foam Consult with local fire au attempting large scale fire fighting operations.     Specific hazards arising from the chemical Hazardous combustion products: Other specific hazards:   These products include: Carbon oxides Nitrogen oxides Silicates Closed containers may explode from heat of a fire. <t< td=""><td>sh air. Check for and upportively. Effects of he material(s) mediately and show ance; give artificial er respiratory n vomits place them th. Keep victim warm</td></t<>	sh air. Check for and upportively. Effects of he material(s) mediately and show ance; give artificial er respiratory n vomits place them th. Keep victim warm
Ingestion:   Do not induce vomiting with out medical advice. If swallowed, seek medical advice imit the container or label. Do not use mouth-to-mouth method if victim ingested the substite container or label. Do not use mouth-to-mouth method if victim ingested the substite container or label. Do not use mouth-to-mouth method if victim ingested the substite container or label. Do not use mouth-to-mouth method if victim ingested the substite container or label. Do not induce vomit with a of a pocket mask equipped with a one-way valve or other propimedical device. Loosen tight clothing such as a collar, tie, belt or waistband. If a person in the recovery position so that vomit will not reenter the mouth and throat. Rinse mou and quiet. Treat symptomatically and supportively. Ensure that medical personnel are material(s) involved and take precautions to protect themselves.     Symptoms/effects:   Redness.     Delayed:   No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take preserves.     5. FIRE-FIGHTING MEASURES   Dry chemical, CO <sub>2</sub> , sand, earth, water spray or regular foam Consult with local fire autattempting large scale fire fighting operations.     Specific hazards arising from the chemical   Hazardous combustion products:     These products include: Carbon oxides Nitrogen oxides Silicates Closed containers may explode from heat of a fire.     Special precautions for fire-fighters:   Verter include: Carbon oxides for fire-fighters:	ance; give artificial er respiratory on vomits place them th. Keep victim warm
Acute: Delayed:   Redness. No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take p themselves.     5. FIRE-FIGHTING MEASURES   Dry chemical, CO2, sand, earth, water spray or regular foam Consult with local fire aut attempting large scale fire fighting operations.     Specific hazards arising from the chemical Hazardous combustion products: Other specific hazards:   These products include: Carbon oxides Nitrogen oxides Silicates Closed containers may explode from heat of a fire.     Special precautions for fire-fighters:   These products include: Carbon beat of a fire.	
Delayed:   No data available     Immediate medical attention:   If breathing has stopped, perform artificial respiration. Use first aid treatment according injury. Ensure that medical personnel are aware of the material(s) involved and take p themselves.     5. heated. Move containers from fire area if you can do it without risk. Special protective equipment for fire-fighters: Wear positive pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection ONLY; it may not be effective in spill situations. Wear chemical protective clothing which is specifically recommended by the manufar provide little or no thermal protection.	ction in fire situations
6. ACCIDENTAL RELEASE MEASURES	
<b>Personal precautions:</b> Avoid contact with skin, eyes, and clothing. Keep people away from and upwind of spi damaged containers or spilled material unless wearing appropriate protective clothing unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure a	(Section 8). Warn
Personal protective equipment: Isolate the hazard area and deny entry to unnecessary and unprotected personnel. Wear eye protection (splash goggles) and face protection (full length face shield). Lab respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Wear protection (nitrile).	coat. Dust
<b>Emergency procedures:</b> Prevent dust cloud. In case of a spill and/or a leak, always shut off any sources of igni area, and excercise caution. Do not touch damaged containers or spilled material unle appropriate protective clothing. Warn personnel to move away. Prevent entry into sew confined areas; dike if needed.	nective gloves

#### Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if without risk. Ventilate the area. Absorb with an inert material and put the spilled material in an appropriate waste disposal container. Use clean non-sparking tools to collect absorbed material. Environmental precautions: Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined

areas; dike if needed.

**TCI AMERICA** 

Precautions for safe handling:	Avoid inhalation of vapor or mist. Avoid contact with skin and eyes. Good general ventilation should be
j	sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear suitable protective clothing, gloves and eye/face protection. When using do not eat, drink, or smoke. Keep away from sources of ignition.
Conditions for safe storage:	Keep only in the original container in a cool well-ventilated place. Keep away from incompatibles. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Avoid prolonged storage periods.
Storage incompatibilities:	Store away from oxidizing agents

#### 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits: No data available

#### Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

Personal protective equipment
-------------------------------

Respiratory protection: Hand protection: Eye protection: Skin and body protection: Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent. Nitrile gloves. Safety glasses. Lab coat.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state (20°C): Form: Color: Odor: Odor threshold:	Solid Crystal - Powder White - Slightly pale reddis No data available No data available	sh yellow	
Melting point/freezing point: Boiling point/range: Decomposition temperature: Relative density: Kinematic Viscosity:	191°C (376°F) No data available No data available No data available No data available No data available	pH: Vapor pressure: Vapor density: Dynamic Viscosity:	No data available No data available No data available No data available
Partition coefficient: n-octanol/water (log Pow)	No data available	Evaporation rate: (Butyl Acetate = 1)	No data available

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective gogles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
