

TCI AMERICA SAFETY DATA SHEET

Revision number: 3 Revision date: 10/06/2014

1. IDENTIFICATION

Product name: Diphenyliodonium Nitrate

Product code: D2357

Product use: For laboratory research purposes. **Restrictions on use:** Not for drug or household use.

Company: TCI America

9211 N. Harborgate Street Portland, OR 97203 U.S.A.

Telephone:

+1-800-423-8616 / +1-503-283-1681

Fax:

+1-888-520-1075 / +1-503-283-1987

e-mail:

2. HAZARD(S) IDENTIFICATION

OSHA Haz Com: CFR 1910.1200: Oxidizing Solids [Category 3]

Signal word: Warning!

Hazard Statement(s): May intensify fire; oxidizer

Pictogram(s) or Symbol(s):

Precautionary Statement(s):

[Prevention] Keep away from heat. Store away from clothing and other combustible materials. Wear protective gloves,

eye protection and face protection.

[Response] In case of fire: Use water spray, wet sand or wet earth to extinguish.

[Storage] None

[Disposal] Dispose of contents and container in accordance with US EPA guidelines for the classification and

determination of hazardous waste listed in 40 CFR 261.3. (See Section 13)

3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Substance

Components: Diphenyliodonium Nitrate

Percent: ...

 CAS Number:
 722-56-5

 Molecular Weight:
 343.12

 Chemical Formula:
 C₁₂H₁₀INO₃

4. FIRST-AID MEASURES

Diphenyliodonium Nitrate TCI AMERICA Page 2 of 5

4. FIRST-AID MEASURES

Inhalation: Call emergency medical service. Move victim to fresh air. Give artificial respiration if victim is not breathing.

Administer oxygen if breathing is difficult. Keep victim warm and quiet. Treat symptomatically and

supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to

protect themselves.

Call a poison center or doctor if you feel unwell. In case of contact with substance, immediately flush skin Skin contact:

with running water for at least 20 minutes. Treat symptomatically and supportively. Ensure that medical

personnel are aware of the material(s) involved and take precautions to protect themselves.

Eye contact: In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye

irritation persists get medical advice/attention. Move victim to fresh air. Check for and remove any contact lenses. Keep victim warm and quiet. Treat symptomatically and supportively. Effects of exposure to substance may be delayed. Ensure that medical personnel are aware of the material(s) involved and take

precautions to protect themselves.

If swallowed, seek medical advice immediately and show the container or label. Loosen tight clothing such Ingestion: as a collar, tie, belt or waistband. If a person vomits place them in the recovery position so that vomit will not reenter the mouth and throat. Rinse mouth. Keep victim warm and quiet. Treat symptomatically and

supportively. Ensure that medical personnel are aware of the material(s) involved and take precautions to

protect themselves.

Symptoms/effects:

No data available Acute: Delayed: No data available

Immediate medical attention: If breathing has stopped, perform artificial respiration. Use first aid treatment according to the nature of the

injury. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect

themselves.

5. FIRE-FIGHTING MEASURES

Suitable extinguishing media: Use water. Carbon Dioxide (CO₂) provide limited control Consult with local fire authorities before

attempting large scale fire fighting operations.

Do NOT use dry chemicals or foams. Unsuitable extinguishing media:

Specific hazards arising from the chemical

These products include: Carbon oxides Nitrogen oxides Halogenated compounds **Hazardous combustion products:**

Other specific hazards: Closed containers may explode from heat of a fire.

Special precautions for fire-fighters:

These substances will accelerate burning when involved in a fire. May ignite combustibles (wood, paper, oil, clothing, etc.). Runoff to sewer may create fire or explosion hazard. Containers may explode when heated. Move containers from fire area if you can do it without risk.

Special protective equipment for fire-fighters:

Wear positive pressure self-contained breathing apparatus (SCBA). Structural fire fighters' protective clothing provides limited protection in fire situations ONLY; it may not be effective in spill situations. Wear chemical protective clothing which is specifically recommended by the manufacturer. It may provide little or no thermal protection.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions: Use spark-proof tools and explosion-proof equipment. Remove all sources of ignition. Do not touch

damaged containers or spilled material unless wearing appropriate protective clothing (Section 8). Warn unnecessary personnel to move away. Stop leak if you can do it without risk. Ensure adequate ventilation.

Isolate the hazard area and deny entry to unnecessary and unprotected personnel.

Safety glasses. Lab coat. Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or Personal protective equipment:

equivalent. Wear protective gloves (nitrile).

Prevent dust cloud. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in the immediate **Emergency procedures:** area). Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Warn personnel to move away. Prevent entry into sewers, basements or confined areas; dike if needed.

Methods and materials for containment and cleaning up:

ELIMINATE all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if without risk. Keep away from combustible materials, reducing agents, acids, metal powders, light, heat, and sources of ignition. Do not get water inside container Absorb with an inert material and put the spilled material in an appropriate waste disposal container.

Environmental precautions:

Prevent further leakage or spillage if safe to do so. Water runoff can cause environmental damage. Prevent entry into sewers, basements or confined areas; dike if needed.

7. HANDLING AND STORAGE

Diphenyliodonium Nitrate TCI AMERICA Page 3 of 5

7. HANDLING AND STORAGE

Precautions for safe handling: Avoid inhalation of vapor or mist. Avoid contact with skin and eyes. Avoid contact with combustible

> material (wood, paper, oil, clothing...). Keep away from heat and sources of ignition. Good general ventilation should be sufficient to control airborne levels. Keep container dry. Handle and open container with care. Wear suitable protective clothing, gloves and eye/face protection. When using do not eat, drink,

or smoke. Keep away from sources of ignition.

Conditions for safe storage: Keep containers tightly closed in a cool, well-ventilated place. Keep away from combustible materials.

Keep away from sources of ignition. Store and use away from heat, sparks, open flame, or any other ignition source. Keep away from incompatibles. Containers which are opened must be carefully resealed

and kept upright to prevent leakage. Avoid prolonged storage periods.

Storage incompatibilities: Combustible substances, Reducing Agents

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limits: No data available

Appropriate engineering controls:

Good general ventilation should be sufficient to control airborne levels. Ventilation is normally required when handling or using this product. Eyewash fountains should be provided in areas where there is any possibility that workers could be exposed to the substance. Follow safe industrial engineering/laboratory practices when handling any chemical.

Personal protective equipment

Respiratory protection: Dust respirator. Be sure to use a MSHA/NIOSH approved respirator or equivalent.

Hand protection: Wear protective gloves.

Eye protection: Safety glasses. Skin and body protection: Lab coat.

9. PHYSICAL AND CHEMICAL PROPERTIES

Solid Physical state (20°C):

Crystal - Powder Form: Color: White - Almost white Odor: No data available No data available Odor threshold:

No data available Melting point/freezing point: pH: No data available No data available No data available Vapor pressure: Boiling point/range: **Decomposition temperature:** No data available Vapor density: No data available Relative density: No data available **Dynamic Viscosity:** No data available

No data available **Kinematic Viscosity:**

No data available No data available Partition coefficient: **Evaporation rate:**

n-octanol/water (log Pow)

No data available Autoignition temperature: No data available Flash point:

No data available Flammability or explosive limits: Flammability (solid, gas): Lower: No data available

Upper: No data available

(Butyl Acetate = 1)

Solubility(ies):

Soluble: Methanol

10. STABILITY AND REACTIVITY

Reactivity: Not Available.

Chemical Stability: Moisture sensitive. Light sensitive.

Possibility of Hazardous Reactions: Oxidizing agents may form explosive peroxides. Exposure to light. Exposure to moisture. Moisture sensitive.

Conditions to avoid: Incompatible materials: Oxidizing agents

Hazardous Decomposition Products: No data available

11. TOXICOLOGICAL INFORMATION

RTECS Number: NN6665000

Acute Toxicity:

ivn-mus LD50:180 mg/kg

Skin corrosion/irritation:

No data available

Serious eye damage/irritation:

No data available

Respiratory or skin sensitization:

No data available

Germ cell mutagenicity:

No data available

Carcinogenicity:

No data available

No data available NTP: No data available OSHA: No data available IARC:

Reproductive toxicity:

No data available

Routes of Exposure: Inhalation, Eye contact, Ingestion.

Symptoms related to exposure:

No specific information is available in our data base regarding the toxic effects of this material for humans. However, exposure to any chemical should be kept to a minimum. Always follow safe industrial hygiene practices and wear proper protective equipment when handling this compound.

Potential Health Effects:

No specific information available; skin and eye contact may result in irriatation. May be harmful if inhaled or ingested.

Target organ(s): No data available

12. ECOLOGICAL INFORMATION

Ecotoxicity

Fish: No data available No data available Crustacea: Algae: No data available

Persistence and degradability: No data available Bioaccumulative potential (BCF): No data available Mobillity in soil: No data available No data available Partition coefficient:

n-octanol/water (log Pow) Soil adsorption (Koc):

No data available No data available Henry's Law:

constant (PaM3/mol)

13. DISPOSAL CONSIDERATIONS

Recycle to process if possible. It is the generator's responsibility to comply with Federal, State and Local **Disposal of product:**

rules and regulations. You may be able to dissolve or mix material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber system. This section is intended to provide assistance but does not replace these laws, nor does compliance in accordance with this section ensure regulatory compliance according to the law. US EPA guidelines for Identification and Listing of Hazardous Waste are listed in 40 CFR Parts 261. The product should not be allowed to enter the environment, drains,

water ways, or the soil.

Disposal of container: Dispose of as unused product. Do not re-use empty containers.

Other considerations: Observe all federal, state and local regulations when disposing of the substance.

15. REGULATORY INFORMATION

Toxic Substance Control Act (TSCA 8b.):

This product is NOT on the EPA Toxic Substances Control Act (TSCA) inventory. The following notices are required by 40 CFR 720.36 (C) for those products not on the inventory list:

- (i) These products are supplied solely for use in research and development by or under the supervision of a technically qualified individual as defined in 40 CFR 720.0 et sec.
- (ii) The health risks of these products have not been fully determined. Any information that is or becomes available will be supplied on a SDS sheet.

16. OTHER INFORMATION

Revision date: 10/06/2014
Revision number: 3

TCI chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its affiliates or subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our SDS are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated SDS for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, face mask, fume hood). For proper handling and disposal, always comply with federal, state and local regulations.
